Commissioner for Patents

The Amendment filed on April 1, 2004 is non-responsive to the prior Office Action because Applicants had elected Group I, drawn to compositions comprising a MAG expression promoter and methods for prophylaxis and/or therapy thereof. The originally presented methods were directed to prophylaxis and/or therapy of a disease caused by hypomyelination or a disease presenting dysmyelination or demyelination. This invention had been constructively elected by original presentation for prosecution on the merits. With the present Amendment the claims are no longer directed to composition claims or the originally presented methods of use. The amended subject matter is directed to methods of promoting expression of MAG and methods for promoting a myelination of axon. These newly presented methods are independent and distinct from the invention originally claimed. Since Applicants' response appears to be bona fide, but through an apparent oversight or inadvertence failed to provide a complete response, Applicants are required to complete the response within a TIME LIMIT of ONE MONTH from the date of this letter.

Any inquiry concerning this communication should be directed to Phyllis Spivack at telephone number 571-272-0585.
